

 Arbejdstilsynet

# Are you safe when handling goods and packages?

The time you spend considering safety today can save you from accidents and sick leave tomorrow. Most accidents happen while the vehicle is stationary.

## Struck by cargo

During loading and unloading.

## Craning

## Injuries when craning.

## Traffic

Accidents when loading and unloading in traffic.

## Falls

Falling from the truck bed or truck.

# Dear driver

You play a crucial role in allowing us to move tonnes of goods and products around Denmark and the world. But no cargo is more important than your safety.

Below are three things to consider before starting your work.

## Your safety is more important than your cargo

1. Do you know what task you need to do?
2. Is there anything unexpected that could make the job dangerous?
3. Who do you contact if the safety conditions are not up to scratch?
